Spring is here and students are getting their hands dirty with ECO!

ECO is delighted to announce that we've begun safely distanced in-person programs with students again! At the end of April, small groups of students joined us outdoors and learned about soil through hands-on activities. It was a joy to come together after so much time apart. One second grade student remarked, "I wish I could rewind time so I could always come back to this."

Thank you to everyone who supported ECO's Home Sweet Home fundraiser! Our community came together to raise \$8,000 for equitable ecology education. Thank you to our leading business partners, [Moberi](#), [Sub Urban Riot](#), [EMA Architecture](#), and [Devil's Food Catering](#)!

PARTNER HIGHLIGHT

ECO is proud to be part of the [Skyline Ridge Neighbors](#) (SRN), the nonprofit, all-volunteer neighborhood association for rural NW Multnomah County, Oregon. The association is working hard to keep the area ecologically healthy and free of invasive weeds. To learn more about their efforts to control garlic mustard, and how you can help, [head to their website!](#) You can learn more about [ECO's Skyline property here.](#)

ECO IS HIRING

ECO is hiring! We're seeking a Director of Development and Communication to join our team. [Check out the updated job announcement](#) which includes an increased salary range and application deadline of June 15. We would appreciate your help spreading the word!

Great opportunities are ahead!

The ECO Team
